

```
std::formatter< std  
::string >
```

A diagram illustrating the inheritance of the `std::formatter` specialization. A light gray box at the top contains the text `std::formatter< std::string >`. A blue arrow points upwards from a darker gray box at the bottom, which contains the text `std::formatter< EventStatus >`. This indicates that the `std::formatter` for `EventStatus` inherits from the `std::formatter` for `std::string`.

```
std::formatter< EventStatus >
```
