

```
std::formatter< std  
::string >
```

A diagram illustrating the inheritance of a C++ specialization. A light gray box at the top contains the text 'std::formatter< std::string >'. A blue arrow points upwards from a darker gray box at the bottom to the bottom center of the light gray box. The bottom box contains the text 'std::formatter< gondola::EventStatus >'. This visualizes that the specialization for 'gondola::EventStatus' inherits from the one for 'std::string'.

```
std::formatter< gondola  
::EventStatus >
```
