

```
std::formatter< std  
::string >
```

A diagram illustrating the inheritance of a C++ `std::formatter` specialization. At the bottom is a grey rectangular box containing the text `std::formatter< gondola::EventStatus >`. A blue arrow points vertically upwards from the bottom center of this box to the bottom center of a white rectangular box above it. The white box contains the text `std::formatter< std::string >`. This visualizes that the `std::formatter` for `std::string` is inherited from the `std::formatter` for `gondola::EventStatus`.

```
std::formatter< gondola  
::EventStatus >
```
