

/home/runner/work/gaps
-online-software/gaps
-online-software/gondola
-core/C++/include/tof_typedefs.h

```
graph TD; A["/home/runner/work/gaps<br/>-online-software/gaps<br/>-online-software/gondola<br/>-core/C++/include/tof_typedefs.h"] --> B["vector"]; A --> C["map"]; A --> D["cstddef"]; A --> E["string"]; A --> F["cstdint"];
```

The diagram illustrates a mapping from a set of file paths to standard C++ headers. A central box at the top lists four paths: /home/runner/work/gaps, -online-software/gaps, -online-software/gondola, and -core/C++/include/tof_typedefs.h. Five blue arrows originate from the bottom of this box and point to five separate boxes below. These boxes are labeled 'vector', 'map', 'cstddef', 'string', and 'cstdint', representing the standard library headers that the paths likely point to.

vector

map

cstddef

string

cstdint
